## **Sycamore Drive**

**Do to the rain today we need to reschedule the closing of Sycamore Dr.**

Sycamore Drive will be closed from W. Reeves Road to S. Cedar Drive to apply Liquid Road to the surface. This will be this **Thursday, June 20, 2024** for the second coat. Work will be scheduled between the hours of 8:30 am and 5:00 pm. Access to the affected street will be severely limited during those hours.

### **Notes and Tips**

Please turn off your irrigation systems this week when work is scheduled. Water will dilute the material.

The street department will have several employees staged throughout the area during this project. Please feel free to ask questions.

### **Plan ahead**

Think about where you are going to park your car if you need to come and go during the project. The eight houses that will be affected on Sycamore Drive between the streets of S. Cedar Dr. and W. Hickory Dr. will be allowed to park on Hickory Dr. and Cedar Dr. during the duration of the project on both days.

If you must leave unexpectedly during the project, rolling slowly through the material will not damage your car. We will assist you getting out.

Driving through wet material onto your driveway will permanently stain your driveway. Please find a street department employee to discuss your situation. The Town of Ellettsville will not be responsible for any damage or stains caused by driving through the wet material without supervision from a street employee.

Again, I apologize for the inconvenience and please be patient with us as we are working in this area.

Best Regards,

Kip Headdy  
Street Commissioner  
Ellettsville Street Department
